

ROHIT KUMAR KASHYAP

Full-Stack Software Engineer | AI / LLM Integration | Backend Systems

rohitkashyapmrt@gmail.com | +91 63978 83500 | Kolkata, India | linkedin.com/in/r2609 | github.com/rohit-jsfreaky | rohitcodes.me

Experience

Software Engineer (Full-Stack) - Techorigins

Remote, July 2025 - Present

- Lead engineer across 14+ production SaaS products on Django, FastAPI, Node.js, Next.js, PostgreSQL, Redis and AWS.
- Cut the TransferPitch transfers dashboard endpoint from roughly five minutes to under one second via query projection, a generated sort column, three-tier Redis caching and cursor pagination.
- Deduplicated roughly a million player records across four providers, taking match lookups from minutes to sub-second with PostgreSQL pg_trgm trigram and match-key indexes.
- Built the AI bookkeeping engine for cuiq (DRF, React, Plaid, Stripe, Gemini 2.5 Flash via OpenRouter); an A/B evaluation harness lifted transaction categorization from ~70% to over 90% on a labeled set.
- Shipped StudioMode.ai (Fal AI, Firebase, Dodo Payments) at 1,000+ image generations a day, and MailValid, a FastAPI service verifying 10,000 emails per batch via async workers and webhooks.
- Standardized backend practice across products: rate limiting, idempotent jobs, retries, webhook orchestration and fault-tolerant integrations with 10+ third-party services.

React.js Developer - Revenza Tech

Remote, May 2025 - July 2025

- Optimized custom ERP modules in React.js, cutting manual processing time ~30% and page load ~25%.

SDE Intern (React Native) - CoRider

Remote, January 2025 - May 2025

- Improved app performance ~40% via render optimization and Redux state management; shipped real-time chat for 500+ concurrent users with sub-100 ms delivery.

Software Developer Intern - Cogent Web Services

Remote, July 2024 - December 2024

- Built 5+ full-stack apps (React, Node.js, Express, PostgreSQL, Redis) with 50+ REST endpoints handling 100+ requests/sec, cutting latency ~300 ms.

MERN Stack Developer Intern - Zidio

Remote, April 2024 - June 2024

- Built an AI resume generator (React + Gemini) producing 50+ resumes daily, and a job portal with authentication and real-time application tracking.

Open Source

OpenClaw (390k stars) - 1 PR merged to main in an open-source personal AI assistant; fixed default vaults being dropped during memory-wiki configure.

Graphify (YC S26, 117k stars) - 3 commits shipped to main in a Python/tree-sitter code knowledge-graph engine used by Claude Code, Cursor and Codex.

Reflex (28.9k stars) - 1 PR merged to main in a Python web framework; fixed the dashboard tutorial's dialog closing before required-field validation could run.

Projects

Cairn - Browser-memory MCP server (Python, on PyPI). 52% fewer tool calls and 47% fewer tokens than Playwright MCP across 90 benchmarked sessions, 30/30 correct. An agent explores a site once; Cairn replays the saved trail deterministically with zero model calls, repairing only the step that breaks. 17 MCP tools over 35 actions.

Pannly - Five-stage async pipeline mining Reddit and Hacker News for startup ideas: crawl, filter, embed, cluster, publish. FastAPI, PostgreSQL with pgvector and Redis; multi-model LLM fallback via OpenRouter with Voyage AI embeddings.

Vouchley - Signup verification API at sub-100 ms cached and under 1.5 s uncached, detecting bots, disposable emails and fraudulent registrations by scoring email reputation, SMTP validity and IP.

Skills

Languages: Python, TypeScript, JavaScript, SQL

Frontend: React, Next.js, React Native, Redux

Backend: Django, Django REST Framework, FastAPI, Node.js, Express, REST APIs

Databases: PostgreSQL, Redis, MongoDB

AI / GenAI: MCP, LLM evaluation, vector search, multi-model routing

DevOps: Docker, GitHub Actions, AWS, Linux

Achievements

Winner, Build with Elements Hackathon - Unlayer (YC W22) - Built Shipped, an open-source developer tool.

Education

Bachelor of Computer Applications (BCA) - Forte Institute of Technology, Meerut | GPA 7.0 / 10.0

June 2021 - August 2024
